

PERSONAL **CARE PLAN**

Dear

Your health is unique to you, and the things you do to maintain good health should be personalized. That's why Gateway HealthSM is sending you a Personalized Prevention Care Plan. The enclosed care plan was developed based on your answers to the Health Assessment Survey.

The steps outlined in your care plan will help screen for certain diseases, prevent illness and manage health conditions you may already have.

Your care plan has been shared with your primary care provider (PCP). We encourage you to make an appointment with your doctor to discuss your plan as well as steps to improve your health and well-being.

If you have any questions about your care plan or would like to make any changes, please call _____ and select the option for Medical Case Management or Behavioral Health Case Management. Case managers are available from 8:30 a.m. to 4:30 p.m., Monday through Friday. TTY users can call 711. Thank you for being a Gateway Health Medicare AssuredSM member and for allowing us to be part of your healthcare team.

Sincerely,
Gateway Health Medicare Assured Clinical Services

TABLE OF CONTENTS

What keeps people from changing?

The answer for most of us is that we don't know how to change. Your **Personalized Prevention Care Plan** will give you the strategies that can help you get started. This plan will show you what you are doing well and how ready you are to change behaviors to improve your health and well-being. Your report does not diagnose illness or substitute for your healthcare provider's advice. Your doctor or nurse can help you develop a health and wellness plan that is right for you.

Your Personalized Prevention Care Plan will be developed and shared with you and your healthcare providers. It can help with early identification of needs, and allow coordinated care to improve your overall health.

Your Personal Care Team

If you have any questions about your Health Assessment Survey or your Personalized Prevention Care Plan, you can contact your **Personal Care Team**. Gateway Health provides you with a Personal Care Team; some members of your care team include your doctor and case manager that will work with you and your health needs. Your Care Team is available to discuss any new or reoccurring issues that you may be having. Together, they develop care and services tailored to your individual specific needs.

All Medicare Assured members have access to their Care Team to help with any concerns as needed. Just call _____ and select the option for Medical Case Management. Case managers are available 8:30 a.m. to 4:30 p.m., Monday through Friday. TTY users can call 711.

Women's Health

PREGNANCY

<<It is important for you to talk to your doctor about a healthy pregnancy diet so you can stay healthy. Remember to schedule your postpartum appointment with your doctor between 21-56 days after you deliver.>>

BREAST CANCER SCREENING

<<You have not had a breast cancer screening within the last year. A breast cancer screening is usually done by getting an x-ray of your breast called a mammogram. Getting a mammogram every two years, for most women ages 50-74, is important to check for the earliest signs of breast cancer. Breast cancer is easier to treat if you find it early. Contact Case Management at <<1-800-685-5209/TTY: 711 (PA)>> <<1-888-447-4505/TTY: 711 (OH)>> <<1-855-847-6430/TTY: 711 (NC)>> <<1-855-847-6380/TTY: 711 (KY)>> or your PCP to schedule an appointment today!>>

<<You have had a screening for breast cancer. Has your provider talked to you about your results? If no, please call your provider to schedule an appointment to discuss your results. If you need assistance with scheduling, please contact Case Management at <<1-800-685-5209/TTY: 711 (PA)>> <<1-888-447-4505/TTY: 711 (OH)>> <<1-855-847-6430/TTY: 711 (NC)>> <<1-855-847-6380/TTY: 711 (KY)>>.>>

CERVICAL CANCER SCREENING

<<You have not had a cervical cancer screening within the last year. Cervical cancer is a mostly preventable form of cancer that impacts women. Regular screening can detect pre-cancer cells early enough to treat. This is done through something called a Pap test, which allows a doctor to look at cells from the cervix to determine if there are signs of cancer. Most women 21-64 years old should get a Pap test every three years. Contact Case Management at <<1-800-685-5209/TTY: 711 (PA)>> <<1-888-447-4505/TTY: 711 (OH)>> <<1-855-847-6430/TTY: 711 (NC)>> <<1-855-847-6380/TTY: 711 (KY)>> or call your doctor to schedule an appointment today.>>
